

## Landscape Installation for Arlington Mills Residences

### LOCATION

Arlington, VA

### CLIENT

Arlington Partnership for Affordable  
Housing (APAH)

### SERVICES

- Site furnishings
- Irrigation
- Landscape installation

E-Landscape Specialty Solutions recently completed landscape installation for the 122-unit affordable housing apartment building in Arlington, VA. Arlington Mills is a 4-story, family-friendly building that features a community room and underground parking. The building is EarthCraft certified, and has incorporated many green design features.

Thirteen of the units will be dedicated as supportive housing units for persons earning very low incomes, at or below 40 percent of the AMI, and who are also clients of Arlington County's Supportive Housing program. An additional thirteen units will be leased to families earning at or below 50 percent of the AMI.

Working side by side with developer Arlington Partnership for Affordable Housing (APAH), Kishimoto Gordon Dalaya Architects, and Studio 39 Landscape Architects, E-Landscape was responsible for providing pavers, bicycle racks, site furnishings, playground equipment, irrigation and landscape plantings.

Together the buildings will form the core of the "Neighborhood Center," one of four major mixed use centers along the Pike within the Columbia Pike Special Revitalization District.
